(54) Title: METHOD FOR ESTATE TRANSACTION BY NETWORK OF MEMBER STORE

(57) Abstract: Since conventional real estate portal sites are one-directionally provided by real estate portal site operators, wrong information may be provided. Also, since a large amount of real estate information must be frequently provided and changed, material and human resources must borne. Also, customers must visit corresponding real estate agents in order to obtain detailed information on the real estate they want after obtaining information on real estate through the Internet unless direct dealings are performed. It is an object of the present invention to provide a real estate information providing method through the network of member stores capable of letting sellers of real estate select whether to directly deal in the real estate through the Internet or to deal in the real estate through real estate agents connected to each other by network and of letting purchasers of real estate obtain detailed information on the real estate for sale through accessible member stores to deal in the real estate when the purchasers deal in the real estate through the member stores. It is another object of the present invention to provide a method of providing real estate information through the network of member stores in which member stores are classified by levels or regions to provide real estate information restricted by the levels or the regions of the member stores when the real estate for sale is requested to be searched.
